LIST OF CONTENTS

Number 1

J. Swait and **A. Bernardino**	1	Distinguishing taste variation from error structure in discrete choice data
T.H. Oum, A. Zhang and **Y. Zhang**	17	Optimal demand for operating lease of aircraft
H.-J. Cho, T.E. Smith and **T.L. Friesz**	31	A reduction method for local sensitivity analyses of network equilibrium arc flows
M. Mozolin, J.-C. Thill and **E. Lynn Usery**	53	Trip distribution forecasting with multilayer perceptron neural networks: A critical evaluation

Number 2

F.S. Koppelman and **C.-H. Wen**	75	The paired combinatorial logit model: properties, estimation and application
Y.-H. Chang, C.-H. Yeh and **C.-C. Shen**	91	A multiobjective model for passenger train services planning: application to Taiwan's high-speed rail line
W.P. Nanry and **J. Wesley Barnes**	107	Solving the pickup and delivery problem with time windows using reactive tabu search
S.P. Hoogendoorn and **P.H.L. Bovy**	123	Continuum modeling of multiclass traffic flow
A. Garcia, D. Reaume and **R.L. Smith**	147	Fictitious play for finding system optimal routings in dynamic traffic networks

Number 3

M. Carey and **E. Subrahmanian**	157	An approach to modelling time-varying flows on congested networks
D.J. Lovell and **C.F. Daganzo**	185	Access control on networks with unique origin–destination paths

C.A. Dangalchev 203 Optimization of the transportation expense of a firm with contractual supplies

M.A. Munizaga, B.G. Heydecker and J. de Dios Ortúzar 219 Representation of heteroskedasticity in discrete choice models

Number 4

Y.-L. Chen and H.-H. Yang 241 Shortest paths in traffic-light networks

H. Yang, M.G.H. Bell and Q. Meng 255 Modeling the capacity and level of service of urban transportation networks

J.N. Prashker and S. Bekhor 277 Some observations on stochastic user equilibrium and system optimum of traffic assignment

O. Hagring 293 Estimation of critical gaps in two major streams

I Forthcoming Papers

Number 5

SPECIAL ISSUE:
METHODOLOGICAL DEVELOPMENTS IN
TRAVEL BEHAVIOR RESEARCH

D. Brownstone, D.S. Bunch and K. Train 315 Joint mixed logit models of stated and revealed preferences for alternative-fuel vehicles

S. Fujii and R. Kitamura 339 Evaluation of trip-inducing effects of new freeways using a structural equations model system of commuters' time use and travel

T.F. Golob 355 A simultaneous model of household activity participation and trip chain generation

O.A. Nielsen 377 A stochastic transit assignment model considering differences in passengers utility functions

R.A. Garrido and H.S. Mahmassani 403 Forecasting freight transportation demand with the space–time multinomial probit model

Y.-H. Liu and H.S. Mahmassani 419 Global maximum likelihood estimation procedure for multinomial probit (MNP) model parameters

I Forthcoming Papers

Number 6

G.A. Godfrey and **W.B. Powell**	451	Adaptive estimation of daily demands with complex calendar effects for freight transportation
T.-H. Chang and **J.-T. Lin**	471	Optimal signal timing for an oversaturated intersection
H.K. Lo and **A. Chen**	493	Traffic equilibrium problem with route-specific costs: formulation and algorithms
T. Akamatsu	515	A dynamic traffic equilibrium assignment paradox
M.G.H. Bell	533	A game theory approach to measuring the performance reliability of transport networks
	547	Erratum
	I	Forthcoming Papers

Number 7

M.L. Hazelton	549	Estimation of origin–destination matrices from link flows on uncongested networks
C.R. Bhat	567	A multi-level cross-classified model for discrete response variables
H.M. Zhang	583	Structural properties of solutions arising from a nonequilibrium traffic flow theory
	I	Forthcoming Papers

Number 8

J. Li, O. Fujiwara and **S. Kawakami**	605	A reactive dynamic user equilibrium model in network with queues
C.O. Tong and **S.C. Wong**	625	A predictive dynamic traffic assignment model in congested capacity-constrained road networks
R.B. Dial	645	Minimal-revenue congestion pricing Part II: an efficient algorithm for the general case
	667	Forthcoming Papers
